

ENVIRONMENTAL POLICY

As a corporate organization of WireCo WorldGroup, implementing the common principles of the Group's Policy, WIRECO Poland sp. z o.o. a manufacturer of wires and steel ropes is a company aware of its impact on the environment. The actions we take, including the implementation of the Integrated Management System in accordance with the ISO 14001:2015, are aimed at responsible use of natural resources, as well as continuous limitation and prevention of negative environmental impacts related to our operations.

We commit ourselves to rational management of natural resources and energy, as well as monitoring of processes carried out in order to prevent breakdowns and environmental pollution.

The obligation will be fulfilled in particular by:

- Fulfillment of compliance obligations and, where possible, placing higher requirements*
- interaction with stakeholders*
- tracking the consumption of energy, raw materials and consumables to implement more cost-effective solutions*
- reducing the risk of environmental failures by monitoring installations and appropriate maintenance of machinery and equipment*
- reducing the amount of waste generated and its proper handling*
- development and continuous improvement of the Integrated Management System in order to improve the environmental performance of operations*

The Environmental Policy is communicated, understood and applied in the Organization and is available to interested parties.
